

AMENDMENTS TO THE SPECIFICATION

In the written specification, please replace page 7, lines 11-17, with the following amended lines:

--- Fig. 5 shows another embodiment of a reduction device for a roll screen according to the present invention comprising a bellows 230 formed between the reduction nut 210 combined by gear with a fixing axis 200 and a bracket 120, wherein an inserting groove ~~232~~ 211 (as illustrated in Fig. 3) located on the upper part of the reduction nut 210 is fit onto a screen-inserting part 111, and the bellows 230 is extended and shrunk by the reduction nut 210, thereby the winding speed of a roll screen may be reduced.
